HONGKONG, AUGUST 12TH, 1882

On the 4th instant the Chief Justice delivered a judgment of very considerable importance to owners of land in the Colony and to the profession. The case in question -Lo On v. LEE Fo WING was brought before the Court to ascertain in whom the title to a certain piece of land lay. This land formerly belonged to the estate of the late Mr. Morrson, whose representatives in July, 1881, sold it to a Mr. Yu Chow, through whom the defendant claimed. It was proved by the evidence of the solicitor who prepared the purchase deed on that occasion, that he had carefully perused the muniments of title in the hands of Mr. Montson's representatives, and had, as is usual, searched in the Registry of titles at the Land Office and that the title, as shown both by the deeds and the Registry, was perfeetly in order. This fact was, indeed; admitted by all parties. Subsequently Mr. Yo Chow resold the property, which was purchased eventually by the defendant. The latter, being desirous of pulling down. the house standing on the land, lately took ample than the present could be steps towards effecting that object, whererepresentative, the plaintiff, an injunction the property. The plaintiff's case was that he had had given to him, or those through possession for apwards of twenty years, sirable to comment on.

With this end in view, the first thing to fidence and reliance that the conveyancers ascertain is the statute law bearing on the point at issue. By the statute of William IV. it is provided that, after the Slat December, 1893, no person shall make any entry or distress, or bring an action to recover any land or rent, but within twenty years next after the time at which the right to make such entry or distress, or to bring such action, shall have first accrued to some person through whom he claims. And subsequent provisions of the Act define the time from which the disqualifying limitsstatute were to be taken as the sole criterion bave to be conceded, in this case, that, as-Colony (No. 8 of 1844) it is provided (Sec. 1) that a Registry Office shall be established for the registration of deeds, conveyances, and "registered in pursuance hereof, shall "have priority one over the other acinstruments in writing

former provides that any one who has been in possession of lands (which includes lands of any tenure and, therefore, leasehold lands, such as the property in dispute) for twenty years, without acknowledging any landlord's title; cannot afterwards be evicted from them. On the other hand, the local ordinance enacta that the instrument under which the holder claims must be registered in a certain way. or it will "as against any subsequent bond "fide purchaser ... be absolutely null "and void to all intents and purposes;" further that even an actual notice of a prior unregistered instrument in writing shall not

The point at issue was practically this. The plaintiff averred that he had held the the whole route from Canton to Tali-foo. land for over twenty years without acknowledgment of any one's title, and so was entitled to it altogether, under 3 and 4 William IV. c. 27. The defendant argued that he had all the rights of the Crown (being in effect a lessee from the Crown), one be of which rights was that the Statute of Limitations did not affect the Crown, and fur ther he relied on the local Registration Ordinance, and maintained that, under its proout notice of the plaintiff's claim, and with a All letters for publication should be written on one duly registered title, must take priority. With great respect to his Lordship ruling, it is very difficult to see how he could have arrived at the decision has given. It may at once be conceded Peers' gallery, and appeared to be an amused and as above, from China and the Straits Settlements, that the Imperial Act applies to this Colony, as indeed his Lordship has held that it does, but, putting uside the defend ant's argument that be possessed Crown rights, which scarcely appears to us to be sustainable, the local Ordinance also applies, and where the two come into conflict, as in this case, is it not reasonable to suppose that the enactment which should prevail is, not the one passed for the benefit of the mother country before Hongkong was even thought of, but the one which was enacted by the Government of the Colony, with the subsequent assent of the Crown, to meet what the local legislature considered to be the wants and requirements of the to the present time, unamended

island, and which has worked down unrevoked, with estisfaction to the community? The more we look at the local Ordinance, the more it seems to us that the defendant should have obtained the judgment, for, by the apparent spirit of the Ordinauce. and by its actual letter, even if the defendant had had express notice of the plaintiff's claim before he bought (which he had not) and had still persisted in buying the land in the face of, and despite, that express notice, and had duly registered (as he did) his purchase deed, even then, he, and not the plaintiff, would be, as it appears to us, the party entitled to the property. What other reasonable construction can be put upon the local Ordinance, or what better exnished of a case properly invoking its upon the Prece Goods Guild, who were in ac- application? It is, in the wording tual possession of the premises, and kept a the provisions we have quotal. perfectly fire engine there, obtained through their clear and free from ambiguity, and the clause which relates to notice of a prior claim restraining the defendant from dealing with does not seem to us to be capable of bearing a second interpretation. If then a purchaser, having express notice of a prior unregistered whom he claimed, a letter of license from the chim, would yet be preferred on duly Crown (which was not registered at the registering his own title, by how much the Land office) to hold the disputed land more ought a purchaser to be preferred who, and that, having entered on the land under as in the present case, purchased bond fide that document, he had been in undisputed and without any notice of the adverse claim. end were being made at home. Mr. Booth had This being so, we are necessarily thrown back without paying rent or acknowledging any upon the conclusion that the Chief Justice, landlord's title during that period, and that | finding the two enactments at variance with therefore, having regard to the provisions of each other, felt himself constrained to S and 4 William IV., c. 27, he could not now | decide that the Imperial Act must prevail be ousted from possession, or compolled to and that that Act, in so far as it differs from ribbon, but they could testify against Sunday pay rent to, or acknowledge the title of, any the local one, must be taken to override one, or quit the property. The suit was the latter, and to correctly exemplify the all Christians to throw off their anathy and fight heard on the 11th July, and the judgment law. It appears to us that this decision is, lately given is the decision we think it de- from a practical point of view, most unfortunate, for firstly it prejudices the con-

If this Imperial has paid his money for nothing. If a strict compliance with the ordinances of the Coloof the law on the issue in question, it would ny, in matters where the language admits of no doubt, is not sufficient, as apparently it suming that it were proved that the plaintiff is not, to protect purchasers or mortgagees, had been in undisputed possession of the pre- we cannot but hope that the local legislamises for twenty years without paying ture will see its way to prevent a recurrence Japan, will leave for his post by the mail from rent to, or otherwise acknowledging the of what seems to us to be a very unfortunate title of, any person, no eviction, and no case. Had the plaintiff registered his letdistress for ront could lawfully be made ter of licence from the Crown, and so against him. But there is an enactment, a given notice on the registry of his claim local one, which, as we think, very materially to all those who subsequently became affects the question, and which should, interested in the land, no such hardthough apparently, having regard to the ship as the present could have occur-Chief Justica's decision, it does not, operate red. "Confucian" writes as follows in the London and China Express of the 7th July :- "Whon; on 3rd inst., Sir John Pope Hennessy, Governor of Hongkong, stood on the mat at the door of the House, under the historic clock, an anxious spectator of the scene culminating in the suspension of his compatriot, Mr. O'Donnell, for fourteen days, his Excellency must have been forcibly reminded of a passage in his own parliamentary career. The House on that day was crowded : always is when feverish 'scenes' are anticipated: baman nature inside and outside of the House is Peers' gallery, honourable commoners were betimes in their places, and the Chaplain was deighted to find so many listeners and the outbreak of such a sudden devotion. Mr. O'Donnell must have felt proud at being the centre of so then member for King's County, at one critical period of his public life. Poland's chieftain was summened to attend a committee; the hon. geatleman discarded the invitation, and instead visited his native shores: his conduct was taken into consideration, with the result that a trusted messenger of Her Majesty's Commoners was despatched to green Erin to bring him bodily back, something after the form that Mr. Pickwick sent Mr. Sam Weller to seize one of his luckless fol owers, whose escapade in the sedan chair has brought on him the wrath of a jealous husband.

On Thursday evening the Royal Naval Society was held at the Temperance Hall. There was a good attendance of members, and the meeting having been opened with devotion, an address on Temperance was delivered by Major Cardew. At the commencement the gallant officer said it was beginning to be fully realised that the only aystem for the reclamation of the drunkard of any realefilcacy was Gospel Temperance. It had long since sen recognised to America, where most ministers were total abstainers, and great efforts to that met with great success in his Blue Bibbon movement, and had got 90, 00 people to take gospel temperance ple ge within nine, months Now the numbers who signed amounted to hundreds of thousande, and persons could be seen wearing the blue badge from a bishop down to a working man. Soldiers and sailors could not wear drinking in the Canteen. With no drunkenness there would be but very little crime, and it behoved against intemperance. Drink was the greatest enemy to the religion, as even under the influence of a moderate quantity of drink, conscience became deadened, and therefore efforts should made to take the evil influence away. Christians who drank were often stumbling blocks in the way of the onuse. The speaker strongly urged and so tends to unsettle the practice, and that religion and temperance should go together. Their object was to save men's sonls, and if secondly, and this is the main objection; a trink stood in the way, they must do combat, and purchaser who has bought land, and whose faith, which conquered the world, give them the professional advisor has satisfied himself victory. In 1878, Sir Michael

HIS EXCELLENCY-I forgot to mention to council just now that the Tramway ! rdinan s still under consideration. I have a letter from the Secretary of State, saying he is not able communicate his decision upon it as yet. THE ESTIMATES.

HIS EXCELLER CY-I beg to lay before the Connoil the estimates of the revenue and expenditure for next year, together with a nate to be read by the clerk directly. I shall be much obliged if hon, members will make convenient to meet in Finance Committee at an early date, to consider the estimates, that I may be able to send them before the end of the present month. not think it will take long, as there is very little change except in the items for public works, which are very considerably above what my hon, friend the Acting Colonial Secretary and I think it would be more convenient if the Acting Colonial Secretary were appointed Chairman of the Finance Committee. It has been usual for the Chief Justice, as the senior nomber of the committee, to take the chair, but as this is purely a matter of finance, I think it would be better to appoint the Acting Colonial Secretary, if the Chief Justice has no objection

The CHIEF JUSTICE intimated his acquiessence in the arrangement suggested. The CLERK then read the minute referred t In laying before the Council the Estimates Revenue and Expenditure for the year 1883. hink it will be interesting to Honourable Members, if I give at the same time some information about the financial position of the Colony. 2.—The balance of Colonial Assets on 1st Janpary last was \$663,710.24, and that of the Spesial Fund Assets at the same period was

1379,910.00, making a total of \$1,043,620.24 3 .- The Secretary of State, in recently conreying his decision that the construction of the Tytam Water Works should be undertaken, has expressed the opinion that as these works will largely benefit the Chinese Community, the Special Fund, so far as it will go, might be properly applied to this purpose. I propose, thereore, with His Lordsbip's sanction, to close the Special Fund Account at the end of the present year, and to transfer the balance to general account. The Tytam Water Works, as well as the expenditure for completion of the Breakwater at Causeway Bay will then be obarged against balances. It will be seen that in the present Estimates these Public Works are only referred to in a note, and also that the contribution to Police Expenditure from interest pre-

duced by the Special Fund, as well as the provision for refund of loans from this Fund for the construction of the Prays and Lighthouses. 4.—In a despatch which was recently laid be fore this Council, the Secretary of State observed that premia from purchase of land, which are receipts for alienation: of Colonial property night to be regarded in the light of Capital rather than of Annual Bevenue. I have accordingly omitted this item from the Estimates of Revenue for 1883. As it may be interesting 1853 to know how much these premis have yielded, I | 1854 have had a statement made up from which it ap- 1856 nears that the total sum received since they were 1957 first levied in 1851 is 31.069.504.00. This sum 1858 is within \$25,000.00 of the total balance of Assets to the Credit of the Colony at the comtherefore, that the Receipts from the Establish.

The CLERK then read the letter, which was ment of the Colony, up to the present time, inoluding both Imperial Grants and Special Fund, but excluding these premis, about balance the expenditure during the same period. During the early period after the occupation, the Expenditure was greatly in excess of Revenue, but in the course of the last ten years the excess of Revenue over Expenditure, excluding premia on land sales, has amounted to \$432,386.00. In the two years 1874 and 1876, the Expenditure ex. of the Appropriation Bill for 1883. geeded Revenue by \$100,000.00; the \$432,386.00 2.—To these remarks of Your Lordship Governor represents, therefore, the nett excess after de- ed the proposition.

The Ordinary Expenditure in 1881 amounted 1762.660, and for this year it has been estimate at \$792.816. The increase of over \$19,000 shews in next year's Estimates is thus explained. 8.—There is a small increase of \$444 in the Madit Department for a copying clerk who stamping blank receipts with series of consecutive numbers, a check on fraud that was recommended by a Committee appointed by the Secretary of State to inquire into the Questions of Defaloations in the Colonies.

The upkeep of the Steam-Launch of the Health Officer and Office-reut for that Officer, already voted by the Council, cause an increase of \$1,000. On the other hand, this vear's Estimates provided \$4,000, for a Steam. Launch for the Health Officer which will, in all mates, which consequently exhibit on the whole slight decrease under this head

12.—Provision has been made for the salaries of eight additional European Constables who are expected from home. These, together with an increase in the good conduct allowances, and of the provision for oil, &c., augment the Estimates by \$4,540, to which must be added certain allowsnoes hitherto paid to Captain Deans and Mr. Creagh from the Special Fund, which are really transfers and not increases. The total excess shown by the Police Estimates of next year amounts to \$6,220.

13.—For the Gaol, the provisional appoint ment of four additional Turnkeys has already been sanctioned by the Finance Committee This causes an increase of about \$1.400. 14-Under the Head Education, there is

reduction in the Normal School which the Seoretary of State directed to be made amounting to \$1,408. On the other hand, the increase to Grants-in-Aid is estimated at \$2,461. The net increase is therefore only \$1,365. 15.—The Pension of \$7,000 granted to \$1

Miscellaneous Services have been reduced by \$2,000. Details of other smaller changes of no sufficient importance to be referred to bere, wil be seen in a statement that has been prepared by the Acting Colonial Secretary. 18.—The contribution to Military Expendi-

ately the sums of \$100,000 on account of the Tytam Water Works, and \$10,000 for completion of the breakwater at Causeway Bay as these amounts are proposed to be taken from balances. 21.—The aum provided for Roads, Streets and Bridges will not I think be found too high. It is \$5,700 in excess of the provision for this year, but it must be remembered that the Council has already had to vote a supplementary sum of \$6,000 for Road and Street Contingencies. The Acting Surveyor General states that \$14,000 is the very lowest sum at which the Streets and Roads out of Victoria can be kept in proper

> HIS. EXCELLERGY.—I think I can give my hop, friend some explanation about this vote to Major Palmer. He was called upon by the Governor last year to make a report on the proposed observatory. He made a report, and sent it in on the 1st October last year, and the report he sent in on the 24th February was a continuation of and supplementary to the previous report, which was sent home so for back as October. He profited by the circumstance of the United States man-of-war Patos being here at that time and obtained the loan of the scientific instruments to determine the latitude by observations of the stars. I suppose in October he could not do it for want of the instruments. I look upon this only as the completion of the work ordered by the Segretary of State. A great deal of labour was incorred by Major Palmer in making these calculations. There are no less than seven pages of the Government Gosette full of figures to determine the positions of the different have taken a deal of time. Under the circumstances I think His Excellency thought the instructions he had received referred to the sound building of the observatory.

Hon. F. B. JOHNSON - I have not the slightest bisotion to the voto to Major Palmer. My objection was to the manuar in which the vote was laid before the Council. HIS EXCULENCY I thought it as well to

THE WATER WORKS. His Excellency—That is all the business, rentlemen. Perhaps before the Council breaks up the members might be glad to learn that the Seretary of State has decided that the construction of the Tytam waterworks shall be directly undertaken—the low level scheme. I may explain that there were two schemes. One was the high level scheme, 500 feet above the level of the sea, but tewas impossible to make a reservoir there the other was an alternative scheme 400 feet above the level of the sea, and to construct a dam 15 feet high, which would take the same quantity of water as the upper one. It was ivided into two schemes, the first to build the 15 feet dam and if that was not sufficient afterwards to raise it to 95 feet when the finance of the colony could stand the expenditure, which would give an enormous amount of water. The Secretary of State has been in consultation with Mr. Price, Mr. Chadwick, and Mr. Rawlinson, an eminent engineer, and has come to the decision that the lower scheme should be carried out at once in its entirety; that is to say, that the dam shall be built up to 95 feet atonce instead of to 15 feet first, and raising the afterwards. Mr. Price has been instructed to buy the machinery at once for commencing work at each end, and to engage foromen who understand this kind of work. About six will be required and one of the reasons why the Becretary of State thought it desirable the work should be colony to continue the work and go through with it than in the course of a few years to have to take it up again and have to bring out another lot of men. I have instructions to commence the work at once if possible, but the Surveyor-

Observations made by M. Rafford, a member of the Societé d'Horticulture at Limoges, show that, a castor-oil plant having been placed in a room infested with flies, they disappeared as by enchantment. Wishing to find the cause, he soon found under the castor-oil plant a number of dead flies, and a answer I can give is that the consumption of large number of bodies had remained clinging to the under-surface of the leaves. would, therefore, appear that the leaves of the castor-oil plant give out an essential oil, or some toxic principle which possesses very | say that it is much approved by the Members. strong insecticide qualities. A HORRIBLE REMINISCENCE.

Phidos Alexin, who died in Lamiz the other day, at the great age of ninety-four, had in his youth contributed—but only under compulsion—to one of the most terrible deeds perpetrated by the Turkish forces employed to crush the Greek rebellion of 1821. He was plying his trade as a master carpenter, in his native town, when Omer Brionie Pasha entered Lamia in triumph, after his victory over the insurgents at Thermopyles, where he had taken several insurrectionary. leaders prisoners, amongst them the celebrated champion of Hellenic liberties, Athenasios Dinkos. The flerce Moslem commander doomed that heroic youth to be spitted on a wooden stake and roasted alive; and Alexin was required, on pain of death, to supply the executioners of this barbarous sentence with all the implements needed for its fulfilment: that is to say, a spit of timber, fitted at either end with a handle, by which it might be made to revolve, and two stout wooden treatles, provided with circular grooves, wherein both extremities of the stake might have free play during the luckless patriot's martyrdom. On the 26th April, 1821, as soon as Alexin had completed the task imposed upon him, the Pasha's inhuman decree was carried out to the letter. Diakos displayed unflinching fortitude throughout his horrible torments; and his death scene, to which Alexin was a witness, made an impression upon the latter's mind that time could not efface. He retained it indeed, with undiminished vividness until within a few hours of his demise.

A FACETIOUS UNDERTAKEE.

One of the most solemn-faced men, while on duty, is David Schuyler, an undertaker of Philadelphia, but at other times he is extremely social and very apt to play tricks upon his friends. He is peculiarly devoted to his trade and his house is furnished with certain peculiar emblems of his calling. He delights in offering cigars from a trick box, which conceals a grinning skeleton that pops up with a weed in his bony fingers when the lid is lifted. Mr. Samuel Hemple, the actor, TURNITURE WAREHOUSE, is an old friend of his, and when the thirtysecond anniversary of his debut arrived. about two weeks ago, the undertaker honoured the event by inviting him and a few mutual friends to a dinner. The invitations were printed upon mourning paper, and at the first sight of the skull and crossed bones which headed them, one might have mistaken the note for an official warning of the Ku-Kiux-Klan. When Mr. Hemple arrived he was ushered into a darkened room, where

only some wax tapers were burning. A table stood in the centre of the room, covered by a handsome black pall-that reached to the floor, and gave it the appearance of a catafalque. Upon this the dinner was laid. The dishes were all appropriately arranged; with fringes of black and white paper around them. The chicken, as it lay "Hong List," Orders for Subscriptions and in its dish upon its back, had a white choker, a blacknecktie and a white dickey at its neck, made of the same material. The salt-cellars had black caps and long, trailing mourning bands around them. The most unique arrangement upon the table was a silver tooth- HAS. pick holder, a small hearse with horses attached, driver upon the box and doors to open at the rear and, where a miniature casket, containing the picks, wasdrawnforth. The mashed potatoes were dug out of a mound, covered with roast-potatoe jackets. which, with sprigs of green planted here and there, looked like a shady burial lot, with several wooden tombstones standing upright

The ice cream was moulded in the shape of a coffin, and the cuts of pie were made in a similar shape. The entire dinner was made as emblematical of the undertaker's trade as taste and ingenuity could devise, and after the first shudder was passed the guests onjoyed themselves in spite of the funereal surroundings. Mr. Schuyler heartily enjoyed the discomfiture of his guests as they entered the room and looked upon the singular sight, and says the fun he derived from the affair amply compensated him for the trouble of preparing for it.
